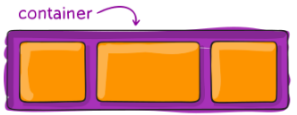
Book

3. Flexbox

3.1. Flex container properties

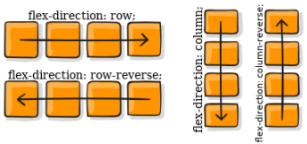


display: flex

This is the CSS property to tell the browser that the element is a flex container.

flex-direction: row | row-reverse | column | column-reverse;

This sets the primary direction of the flex items inside the flex container:



flex-wrap: nowrap | wrap | wrap-reverse;

This property specifies the behaviour of the flex items when their total size is greater than the size of the flex container's main size.

Let's say that the flex direction is row :

- **flex-wrap: nowrap** will make the items stay on one line, going out of the container's boundaries
- **flex-wrap: wrap** will make the items go to the line below
- **flex-wrap: wrap-reverse** will make the items to to the line above

Table of contents

1. What is HTML ?
1.1. Basic structure of an HTML page
1.2. HTML attributes
1.3. Hyper links
1.4. HTML tags you have to know
1.5. Layout and elements flow

T - Module 01 - Course template

Short introduction

This module describes how to create a course on Moodle from scratch with screen capture illustrations.

Here are 5 main activities that need to be figured out:

1. create a category & a course
2. create a course layout
3. create an introduction video
4. create a book
5. create the forms of exercise and evaluation parts

About this course

Course notice board

Course FAQ

Introduce yourself!

Any question about this course?

Open all Close all

Instructions: Clicking on the section name will show / hide the section.

Course

This book will help you to understand each step of creating content for your course in Moodle by respecting OHA templates. Few screen shots are added to illustrate step instructions.

Book

Practical exercises

These exercises could help you understand more about the course layout and various existing content types. Let's figure out your favorite exercise format!

Practice makes perfect!

Create category - Branching scenario

Create a new course - Course presentation

Enroll user - Drag & drop

Create course layout - Hotspots

Create header section - Drag the words

Create book - Image sequencing

Create book 2 - Interactive video

Create exercises - H5P content types

Create exercises - Flashcards

Create quiz & feedback

Evaluation

This section contains
- a small quiz to test your knowledge required after the Templates course.

- a feedback to share your views on this course.

Test

Certificate of completion

Restricted Not available unless: The activity **Test** is marked complete

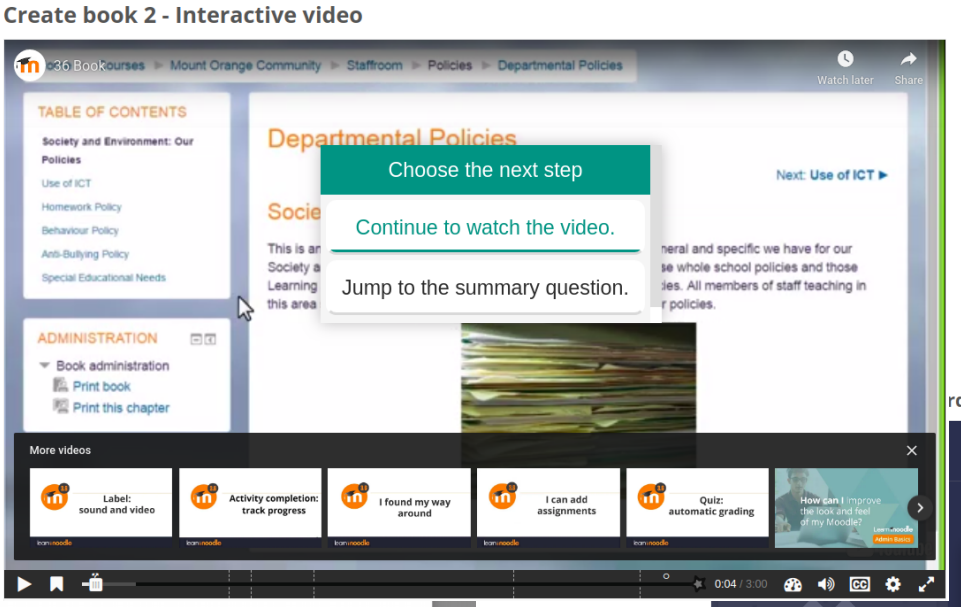
Module feedback

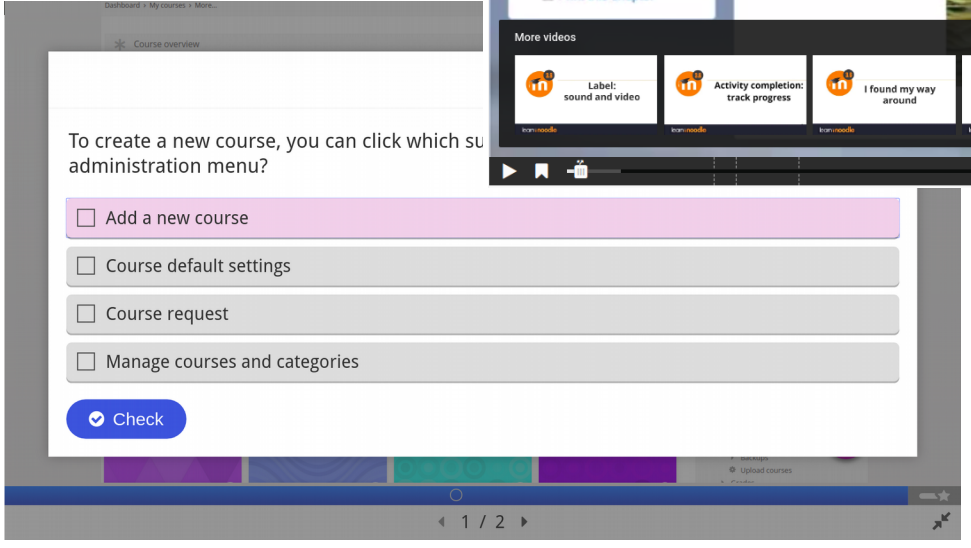
Please let us know your opinion about the course by completing these questions!

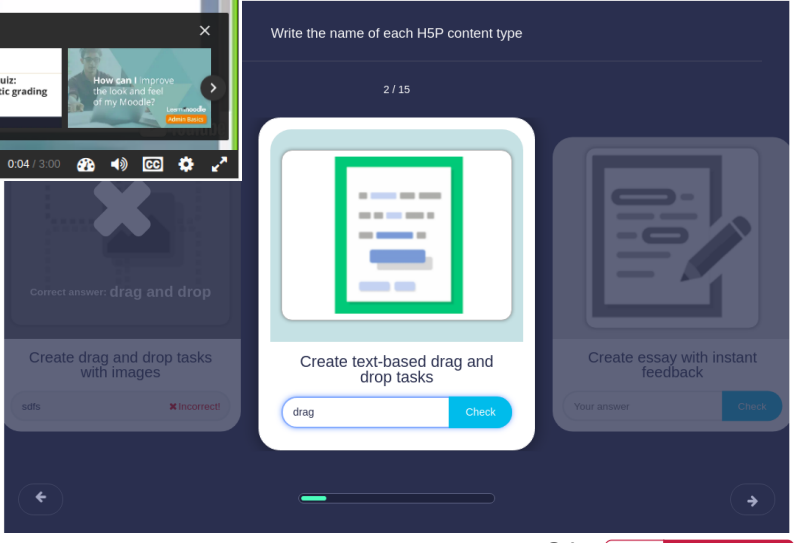
LINAGORA

2. CREATE MOODLE E-LEARNING CONTENT

- Interactive content

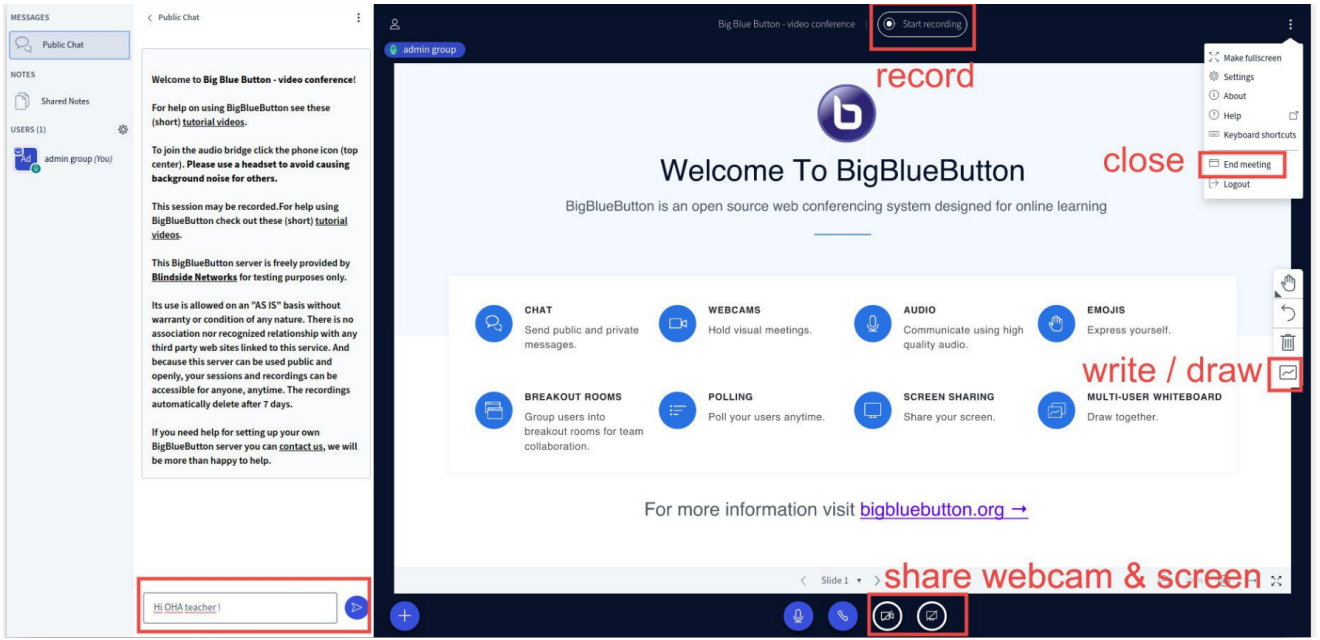


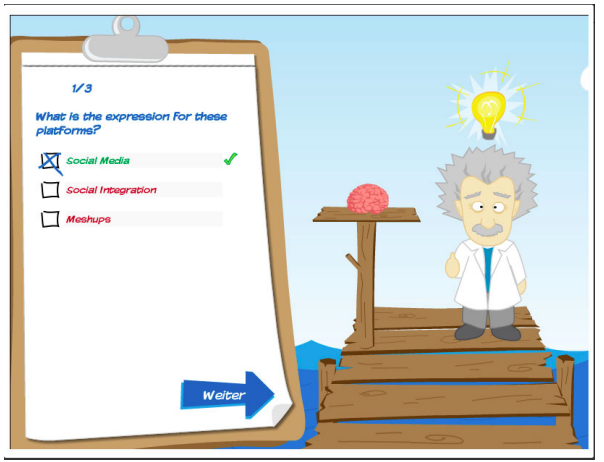


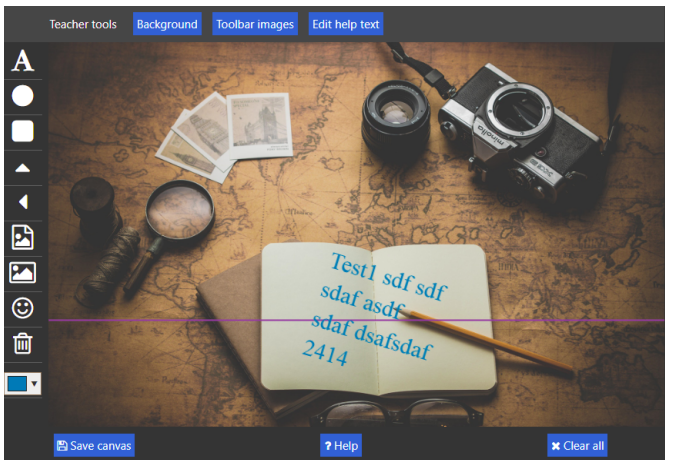


2. CREATE MOODLE E-LEARNING CONTENT

- Live content

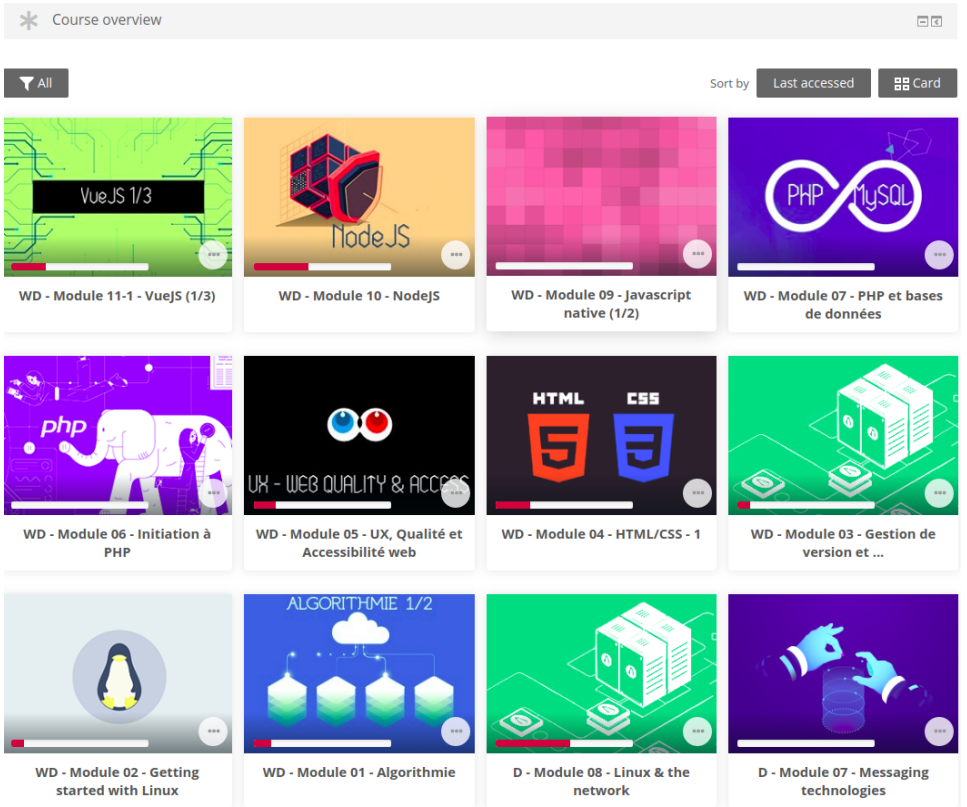






2. CREATE MOODLE E-LEARNING CONTENT

- We can also build must-have content items such as customized courses thumbnails (with watermark), templates for course layout & certificates.



3. GET CONSULTANCY SERVICES

- Moodle can be complex at times.
